

ENGINE STARTING PROCEDURE

Starting the engine should be relatively simple.

1. Ignition OFF
2. Choke ON
3. Throttle OPEN wide
4. Flip the prop until you see fuel coming into the carb OR you hear it gurgling in the carb
5. Flip several more times.
6. Close throttle
7. Open throttle slightly (less than 1/4)
8. Choke OFF
9. Ignition On
10. Flip prop to start.
11. It is assumed your plane is well secured!!
